The Post Office Electrical Engineers' Journal

INDEX

VOLUME 72

(April 1979–January 1980)

A

Abnormal Telephone-Exchange Congestion, Solution to .. 215
ADAMS, P. F., and WELSH, E. J. A New Digital 1VF Signalling Unit 108
Alarms by Carrier 123
ALLEN, D., and PRICE, C. D. E. System X: Design and Support
Part 1—Information System 229
Amplifier for 11 GHz Digital Radio-Relay Systems, An IMPATT Diode 220
ARCHER, C. Continuous Power-Generation at the Goonhilly Satellite Communications Earth Station 166
Architecture of System X
Part 1—An Introduction to the System X Family .. 138
Part 2—The Digital Trunk Exchange 142
Associate Section National Committee Report, The 69, 134, 201, 274
Associate Section Notes 69, 135, 201, 275
Auto-Manual Centre in Non-Standard Premises, Installation of an 94
AVIS, J. M. The Formation of the New National Post Office Telecommunications Museum 141

B

BECKLEY, D. J. Main Transmission Network: Planning of Digital Transmission Systems 27
BELENKIN, A. M., and BROOKS, B. M. G. Plessey Pentex Installation in the UK Network 186
Book Reviews 8, 26, 42, 80, 86, 122, 152, 159, 179, 197
BROOKS, B. M. G., and BELENKIN, A. M. Plessey Pentex Installation in the UK Network 186
BROWN, A. M. Developments in Frequency-Shift Voice-Frequency Telegraph Equipment 191
BUNDY, R. An Injection-Welded Joint Repair 190

C

Cable Systems: A Review of their Evolution and Future, Submarine 87
Carbon Microphone, The Electret: A Possible Replacement for the 15
Carrier, Alarms by 123
CARRUTHERS, P. A., BIGGS, S. L., and GORVIN, R. G. K. STEMSS: Satellite Telegraph Engineering and Management Switching System 59
CARTER, M. J. High-Voltage Power System for Telecommunication Plant: A Safety Aspect 117
CHAMBERLAIN, I. C., and KINGSWELL, L. W. Alarms by Carrier 123
CLARKE, K. E. Viewdata Abroad—The Technical Aspects 172
Components: Results of the Field Trial of the Regenerator 5 A, Reliability of Electronic 81
Computer-Aided Design
System X: Design and Support, Part 2 234
Conclusions from the Empress Digital Tandem Exchange Field Trial 9
Conferences, Forthcoming 70, 136, 203, 275
Congestion, Solution to Abnormal Telephone-Exchange .. 215
Continuous Power-Generation at the Goonhilly Satellite Communications Earth Station 166
COOPER, T. R., and HELLEUR, R. J. System X Software Engineering 240
CRUMP, N. G. A New Equipment Practice for Transmission and Other Applications: TEP–1(E) 160
DAVIES, A. P. Submarine Cable Systems: A Review of their Evolution and Future 87

D

DAVIES, E., and HARRIS, L. R. F. System X and the Evolving UK Telecommunications Network 2
DC Power Supplies to Telecommunications Equipment: Distribution, Earthing and Protection Against Induced Transient Voltages
Part 1—Past and Present Arrangements 175
Part 2—A New Method 247
Development of an 11 GHz Digital Radio-Relay System
Part 1—Design Considerations 102
Part 2—System Configuration and Parameters .. 153
Developments in Frequency-Shift Voice-Frequency Telegraph Equipment 191
DICKINSON, J. P. Solution to Abnormal Telephone-Exchange Congestion 215
Digital Local Networks 206
Digital Network, Filter Specification in a 96
Digital 1VF Signalling Unit, A New 108
Digital Radio-Relay System, Development of an 11 GHz
Part 1—Design Considerations 102
Part 2—System Configuration and Parameters .. 153
Digital Radio-Relay Systems, An IMPATT Diode Amplifier for 11 GHz 220
Digital Recording on Magnetic Tape and the Recorder Tape No. 3A 180
Digital Tandem Exchange Field Trial, Conclusions from the Empress 9
Digital Transmission Systems, Main Transmission Network: Planning of 27
Diode Amplifier for 11 GHz Digital Radio-Relay Systems, An IMPATT 220
Director, The MOST
Part 1—System Outline, Technology and Call Routing 266
Distribution, Earthing and Protection Against Induced Transient Voltages, DC Power Supplies to Telecommunications Equipment:
Part 1—Past and Present Arrangements 175
Part 2—A New Method 247

E

Earthing and Protection Against Induced Transient Voltages, DC Power Supplies to Telecommunications Equipment: Distribution,
Part 1—Past and Present Arrangements 175
Part 2—A New Method 247
Earth Stations, Use of a Single-Channel-per-Carrier Terminal Equipment at Satellite System 54
Electret: A Possible Replacement for the Carbon Microphone, The 15
Electronic Components: Results of the Field Trial of the Regenerator 5A, Reliability of 81
11 GHz Digital Radio-Relay System, Development of an
Part 1—Design Considerations 102
Part 2—System Configuration and Parameters .. 153

11 GHz, Digital Radio-Relay Systems. An IMPATT Diode Amplifier for 220
Empress Digital Tandem Exchange Field Trial, Conclusions from the 9
Engineering in the British Post Office—A Look Ahead .. 73
Equipment Practice for Transmission and Other Applications: TEP-1(E) 160
Evolving U.K. Telecommunications Network, System X and the 2
Experimental Packet-Switched Service, Operational Experience and Evolution of the British Post Office .. 43

F

55-Channel Unit, A New Mobile Unit for the Radiophone Service: Development of a 50
Formation of the New National Post Office Telecommunications Museum 141
FOULKES, S. A., and KEANE, A. J. Use of Single-Channel-per-Carrier Terminal Equipment at Satellite System Earth Stations 54
Frequency-Shift Voice-Frequency Telegraph Equipment. Developments in 191

G

Generator for the Simulation of Interference Caused by Secondary Lightning Effects, An Impulse 118
Goonhilly Satellite Communications Earth Station, Continuous Power-Generation at the 166
Greater Manchester Police Authority, A New Telecommunications System for the 66
GRIFFITHS, J. M. Digital Local Networks 206
GRUNWELL, K. H., and WALTON, D. The MOST Director
Part 1—System Outline, Technology and Call Routing 258

H

HALL, R. S., and SNAITH, M. J. Jitter Specification in a Digital Network 96
HARRIS, L. R. F., and DAVIS, E. System X and the Evolving U.K. Telecommunications Network 2
HAWKINS, J. W. The Mayfield Incident 131
HELLEUR, R. J., and COOPER, T. R. System X Software Engineering 240
HENDERSON, J. C., and PILGRIM, M. An IMPATT Diode Amplifier for 11 GHz Digital Radio-Relay Systems .. 220
HENDERSON, J. P. A Standard Control for Thyristor Rectifiers 36
High-Voltage Power System for Telecommunication Plant: A Safety Aspect 117
HORTH, P. J., and REYNOLDS, R. A. System X: Design and Support
Part 2—Computer-Aided Design 234

I

IMPATT Diode Amplifier for 11 GHz Digital Radio-Relay Systems, An 220
Impulse Generator for the Simulation of Interference Caused by Secondary Lightning Effects, An 118
Induced Transient Voltages. DC Power Supplies to Telecommunications Equipment: Distribution, Earthing and Protection Against
Part 1—Past and Present Arrangements 175
Part 2—A New Method 247
Injection-Welded Joint Repair, An 190
Installation of an Auto-Manual Centre in Non-Standard Premises 94
Institution of Post Office Electrical Engineers 67, 133, 198, 273
INTELPOST 216
Introduction of a Pentex Exchange into the Public Network, The 133

J

JARVIS, E. G., and SCOTT, R. P. I. Development of an 11 GHz Digital Radio-Relay System
Part 1—Design Considerations 102
Part 2—System Configuration and Parameters .. 153
Jitter Specification in a Digital Network 96
Joint Repair, An Injection-Welded 190
JONES, W. G. T., and KERSWELL, B. R. Conclusions from the Empress Digital Tandem Exchange Field Trial .. 9
JONES, W. G. T., KIRTLAND, J. P., and MOORE, B. W. Principles of System X 75

K

KEANE, A. J., and FOULKES, S. A. Use of Single-Channel-per-Carrier Terminal Equipment at Satellite System Earth Stations 54
KERSWELL, B. R., and JONES, W. G. T. Conclusions from the Empress Digital Tandem Exchange Field Trial .. 9
KINGSWELL, L. W., and CHAMBERLAIN, I. C. Alarms by Carrier 123
KIRTLAND, J. P., MOORE, B. W., and JONES, W. G. T. Principles of System X 75

L

Laser Development and Production, Semiconductor .. 19
Lightning Effects, An Impulse Generator for the Simulation of Interference Caused by Secondary 118
Local Network, Digital 206
Logging Device, A Microprocessor-Controlled Teletraffic .. 149

M

Magnetic Tape and the Recorder Tape No. 3A. Digital Recording on 180
Main Transmission Network: Optimization of Planning Methods 251
Main Transmission Network: Planning of Digital Transmission Systems 27
Management Switching System, STEMSS: Satellite Telegraph Engineering and 59
Manchester Police Authority, A New Telecommunications System for the Greater 66
MARLOW-MANN, P. D. G. Operational Experience and Evaluation of the British Post Office Experimental Packet-Switched Service 43
MATTY, G. P. The Introduction of a Pentex Exchange into the Public Network 133
Mayfield Incident, The 131
Microphone, The Electret: A Possible Replacement for the Carbon 15
Microprocessor-Controlled Teletraffic Logging Device, A 149
MILFORD, C., and WILLIAMS, J. B. Installation of an Auto-Manual Centre in Non-Standard Premises 94
Mobile Unit for the Radiophone Service: Development of a 55-Channel Unit, A New 50
MOORE, B. W., JONES, W. G. T., and KIRTLAND, J. P. Principles of System X 75
MORGAN, A. J., and WALKER, R. R. The Electret: A Possible Replacement for the Carbon Microphone 15
MORRIS, R. C. Use of Vehicles in the Telecommunications Business 258
MOST Director, The
Part 1—System Outline, Technology and Call Routing 266
Multiplex Systems, Telegraph Time-Division 212
Museum, The Formation of the New National Post Office Telecommunications 141
Museum in the South-Eastern Telecommunications Region, Telecommunications 197

N

National Post Office Telecommunications Museum, The Formation of the New 141
New Digital 1 VF Signalling Unit, A 108
Notes and Comments 68, 200, 273

O

1VF Signalling Unit, A New Digital 108
Operation Experience and Evaluation of the British Post Office Experimental Packet-Switched Service 43
Optimization of Planning Methods, Main Transmission Network 251

P

Packet-Switched Service, Operational Experience and Evaluation of the British Post Office Experimental .. 43
Pentex Exchange into the Public Network, The Introduction of a 133
Pentex Installation in the UK Network, Plessey 186
PIGOTT, A. C. Main Transmission Network: Optimization of Planning Methods 251
PILGRIM, M., and HENDERSON J. C. An IMPATT Diode Amplifier for 11 GHz Digital Radio-Relay Systems 220
Planning Methods, Main Transmission Network: Optimization of 251
Planning of Digital Transmission Systems, Main Transmission Network: 27
Plessey Pentex Installation in the UK Network 186
Police Authority, A New Telecommunications System for the Greater Manchester 66
Post Office Press Notices 66, 250
Power-Generation at the Goonhilly Satellite Communications Earth Station, Continuous 166
Power Supplies to Telecommunications Equipment: Distribution, Earthing and Protection Against Induced Transient Voltages, DC
Part 1—Past and Present Arrangements 175
Part 2—A New Method 247
Power System for Telecommunication Plant: A Safety Aspect, High-Voltage 117
PRICE, C. D. E., and ALLEN, D. System X: Design and Support
Part 1—Information System 229
Principles of System X 75

Protection Against Induced Transient Voltages. DC Power Supplies to Telecommunications Equipment: Distribution, Earthing and
Part 1—Past and Present Arrangements 175
Part 2—A New Method 247

R

Radiophone Service: Development of a 55-Channel Unit, A New Mobile Unit for the 50
Radio-Relay System, Development of an 11 GHz Digital
Part 1—Design Considerations 102
Part 2—System Configuration and Parameters .. 153
Radio-Relay Systems, An IMPATT Diode Amplifier for 11 GHz Digital 220
Recorder Tape No. 3A, Digital Recording on Magnetic Tape and the 180
Regenerator 5A, Reliability of Electronic Compartments: Results of the Field Trial of the 81
Reliability of Electronic Components: Results of the Field Trial of the Regenerator 5A 81
Repair, An Injection-Welded Joint 190
Review of their Evolution and Future, Submarine Cable Systems: A 87
REYNOLDS, F. H., and STEVENS, J. W. Reliability of Electronic Components: Results of the Field Trial of the Regenerator 5A 81
REYNOLDS, R. A., and HORTH, P. J. System X: Design and Support
Part 2—Computer-Aided Design 234

S

Safety Aspect, High-Voltage Power System for Telecommunication Plant: A 117
Satellite Communications Earth Station, Continuous Power-Generation at the Goonhilly 166
Satellite System Earth Stations, Use of Single-Channel-per-Carrier Terminal Equipment at 54
Satellite Telegraph Engineering and Management Switching System, STEMSS: 59
SCOTT, R. P. I., and JARVIS, E. G. Development of an 11 GHz Digital Radio-Relay System
Part 1—Design Considerations 102
Part 2—System Configuration and Parameters .. 153
Secondary Lightning Effects, An Impulse Generator for the Simulation of Interference Caused by 118
Semiconductor Laser Development and Production .. 19
SHELDON, M. I. B. An Impulse Generator for the Simulation of Interference Caused by Secondary Lightning Effects 118
Signalling Unit, A New Digital 1VF 108
Simulation of Interference Caused by Secondary Lightning Effects, An Impulse Generator for the 118
Single-Channel-per Carrier Terminal Equipment at Satellite System Earth Stations, Use of 54
SMITH, J. D. A Microprocessor-Controlled Teletraffic Logging Device 149
SMITH, J. M. Telecommunications Museum in the South-Eastern Telecommunications Region 197
SNAITH, M. J., and HALL, R. D. Jitter Specification in a Digital Network 96
Software Engineering, System X 240
Solution to Abnormal Telephone-Exchange Congestion .. 215
South-Eastern Telecommunications Region, Telecommunications Museum in the 197
SPENCE, K. L. INTELPOST 216
Standard Control System for Thyristor Rectifiers, A .. 36
STEMSS: Satellite Telegraph Engineering and Management Switching System 59
STEVENS, J. W., and REYNOLDS, F. H. Reliability of Electronic Components: Results of the Field Trial of the Regenerator 5A 81
Submarine Cable Systems: A Review of their Evolution and Future 87
System X, Architecture of
Part 1—An Introduction to the System X Family .. 138
Part 2—The Digital Trunk Exchange 142
System X and the Evolving U.K. Telecommunications Network 2
System X: Design and Support
Part 1—Information System 229
Part 2—Computer-Aided Design 234
System X Principals of 75
